

To Whom It Does Concern:

I am a subscriber and frequent listener to XM Satellite Radio. I do benefit from listening to XM Instant Traffic and Weather as a consumer. I do not have a television in my vehicle nor do I want one. Stop infringing on rights of all subscribers by initiating and passing frivolous regulations that ban essential information from being broadcast. The bottom line is that we pay for these services. If we pay for these services, then we are going to be provided these services. Again, stop this frivolous fabrication of new regulation. This country is composed of people not robots. You cannot just dictate or remove public information such as this. What exactly gives you that right? Definitely not the Bill of Rights as this part of the constitution is for the citizen!
